These] these two gas pre-distribution chambers [are] being separated by partition plate.

2. (Once Amended) A partitioned, jetting fluidized-bed [jetting] with double nozzles according to claim 1, [where] wherein the combined gas distributor of the gas pre-distribution chamber [involves] comprises three layers, one being a perforated distribution board, and the other two being an anticorrosion fiber cloth and a stainless steel mesh, respectively.

3. (Once Amended) A partitioned, jetting fluidized-bed [jetting] with double nozzles according to claim 1, [where] wherein the ratio of the horizontal nozzle diameter to the inclined nozzle diameter ranges from $1/5$ to $1/3$, and the upward inclination angle of the inclined nozzle [(with relation)] with respect to the vertical wall[] is in the range of 25° - 55° .
